

# Hull Precleaner alkaline

## Alkaline pre-cleaner for boat hulls and decks

The highly concentrated, phosphate-free Hull PreCleaner alkaline for pre-washing the boat deck and hull. The combination of high-quality complexing agents and special surfactants quickly dissolves even stubborn deposits such as bird and duck droppings, environmental and weather-related soiling and is therefore ideal for alkaline pre-cleaning. Suitable for gelcoat and boat paint surfaces as well as teak replacement coverings and PVC.

page 1 of 1

### Areas of use

Gelcoat, paint and plastic surfaces on board, e.g. hull and deck

### Recommendations for use

Dilute the pre-cleaner 1:20 to 1:60 with water, depending on the degree of soiling; apply to the surface using a DPZ or washing sponge and leave to work for a maximum of 5 minutes. If necessary, rework with the Interior Scrubber. Then wash off thoroughly with water and a sponge. Avoid sensitive surfaces such as galvanized steel and aluminium surfaces or real wood. After thorough cleaning, polish and seal the surface to protect it from rapid resoiling.

### Container

Container	Item no.
1 L	513001
10 L	513010

pH-value: 13,1

### Warnings

Check for material compatibility before use. Do not use on real wood. Only use on washable surfaces. Do not use on hot surfaces. Do not allow to dry.
